George M. O'Brien

Kidney Research Core Center

Operations and Outreach Administrator for the George M. O'Brien Kidney Center at Northwestern is Announced

We are delighted to announce that Ashley Sipocz will join the NU-GoKIDNEY Center as Operations and Outreach Administrator on February 8, 2019. Ashley, who holds a bachelor's degree in psychology and a master's degree in public health, joined Northwestern University in 2014. In her role as Recruitment and Retention Services Manager at the Northwestern University Clinical and Translational Science Institute (NUCATS), Ashley partnered with research teams to provide the knowledge, tools, and

support to engage study participants and meet recruitment goals. At the NU-GoKIDNEY Center, Ashley will lead efforts to further our mission: promotion and support of innovative research leading to the discovery of novel nephro-therapeutics, which will transform prevention and treatment of kidney diseases and eventually lead to cures. These efforts will involve engaging stakeholders and developing collaborative programs among the Chemistry of Life Processes Institute (CLP), the Division of Nephrology, and other departments and schools on campus, as well as research institutions throughout the world. Check www.nephroHUB.org for upcoming events, and remember to follow us on Twitter @NU_Nephrology @asipocz.
